

Getting the Most Out of Your Dental Practice

The purpose of the “GP Manual” is to help you to help your referring dentist to operate a more efficient, better-organized and better-managed dental practice.

As indicated in the Table of Contents, the “GP Manual” contains the kinds of programs required to operate a general dental practice. Most dentists don’t have a structured approach to managing their practice and only impose necessary programs when something goes wrong, for example, they design a “Office Policies and Benefits Manual” after there is significant strife with certain team members.

The “GP Manual” gives your referring dentist programs to pick and choose to implement either after a problem arises or hopefully before. The manual contain the forms, procedures, languaging, etc., required to implement customized programs the way the GP wants to treat his or her patients. There are accompanying media files (Word files) for him or her to design their own customized forms.

The “GP Manual” is the perfect gift for any dentist that will give you a return on your investment for many years to come.
